

PO9 – WATER METERS

LWIC require that all shareholders with a shareholding of more than 20 shares have water meters installed at their point(s) of take by the 1st September 2015.

In order for the Company to ensure the continuation of a reliable and fair distribution of water to all of its shareholders it is Company policy that water meters with telemetry units must be fitted to all existing irrigation pumps.

LWIC have had a policy in place since 2010 that all new spray irrigation (BDK - Spray conversions) installed water meters.

- Shareholders must check with LWIC for correct rate of continuous take before installation.
- Meters must be ECAN compliant pulse output magFlow type.
- Meters must be installed by an ECAN approved installer.
- Shareholder pays for meter(s) including installation, meters remain the property of the shareholder.
- LWIC pays for telemetry unit(s) including installation, telemetry units remain the property of LWIC.
- Meters to be maintained and calibrated every 5 years at the cost of the shareholder.
- Shareholders pay an annual fee for Telemetry data presentation for each pumps.
- Shareholders with 20ha or less are not required to install water meters.
